UBS Fund Management (Ireland) Limited is authorised in Ireland and regulated by the Central Bank of Ireland.

Date of production of the KID: 19 October 2023.

What is this product?

Type

UBS (Irl) ETF Plc is an umbrella investment company with variable capital and segregated liability between sub-funds incorporated in Ireland and authorised by the Central Bank as an Undertaking for Collective Investment in Transferable Securities under the UCITS Regulations. The fund is a UCITS ETF.

Term

The Product does not have a maturity date (the Product has been established for an indefinite period of time). The Manufacturer may terminate the Product early. The amount you will receive upon early termination may be less than the amount you invested.

Objectives

The Fund is passively managed and seeks to track the performance of the S&P Developed ESG Elite Dividend Aristocrats Index (Net Return) (the "Index"). The Index is designed to reflect the performance of high dividend yielding / ESG-scoring companies that meet sustainability criteria and meet the eligibility criteria defined in the S&P High Yield Dividend Aristocrats Index. Constituents are selected from eligible companies in the S&P Composite 1500 that have followed a managed-dividends policy of increasing or maintaining dividends for at least 20 consecutive years. Constituents are weighted by indicated dividend yield. The Fund will seek to hold all of the shares of the Index, in the same proportions as the Index, so that the portfolio of the Fund will be a near mirror image of the Index. The Fund may, in exceptional circumstances, hold securities which are not comprised in the Index, including, e.g., securities which are expected to shortly be included in the Index. The Fund may, for efficient portfolio management, use derivative instruments which may multiply the gains or losses made by the Fund on given investment or on its investments generally.

Currency hedged share classes may also be available in the Fund.

The impact of currency fluctuations between any foreign currency to the Index currency is reduced by selling foreign currency forwards at one month forward rate in line with the currency version of the Index. Hedging reduces the effect of the fluctuations in the exchange rate between the currencies of the equity securities (i.e. shares) that make up the Index and EUR, the currency of the Share Class.

This sub-fund promotes environmental and/or social characteristics but does not have a sustainable investment objective.

The Fund will not enter into any securities lending.

This class distributes its net income in order to maintain the maximum tracking accuracy of the S&P Developed ESG Elite Dividend Aristocrats Index (Net Return).

Intended retail investor

This fund applies to retail investors with a basic financial understanding, who can accept a possible loss on the investment amount. The fund is aimed at generating a substantial part of its yield through recurring income and addresses a preference for Sustainable Investing, while granting daily access to the capital under normal market conditions. With their investment in this fund, investors can satisfy medium term investment needs. The fund is suited to be acquired by the target client segments without any restriction of the distribution channel or platform.

What are the risks and what could I get in return?

Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7 which is a medium risk class.

This rates the potential losses from future performance at a medium level. The past may be a poor predictor of the future and, hence, the actual risk of losing money may vary significantly.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The product may be exposed to further risk factors such as operational, political and legal risks which are not included in the summary indicator. Please refer to the prospectus for more detail.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 year(s). Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		USD 10 000	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	USD 1 310	USD 1 230
	Average return each year	-86.9%	-34.2%
Unfavourable	What you might get back after costs	USD 7 430	USD 8 330
	Average return each year	-25.7%	-3.6%
Moderate	What you might get back after costs	USD 9 960	USD 11 470
	Average return each year	-0.4%	2.8%
Favourable	What you might get back after costs	USD 16 050	USD 15 160
	Average return each year	60.5%	8.7%

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all costs of the product itself. The figures do not take account of your personal tax situation, which can also have an impact on how much you receive back.

Unfavourable scenario: This type of scenario occurred for an investment between 2015 and 2020.

Moderate scenario: This type of scenario occurred for an investment between 2018 and 2023.

Favourable scenario: This type of scenario occurred for an investment between 2016 and 2021.

What happens if UBS Fund Management (Ireland) Limited is unable to pay out?

Losses are not covered by an investor compensation or guarantee scheme. Furthermore, with respect to State Street Custodial Services (Ireland) Limited as depositary of the Fund, which is responsible for the safekeeping of the assets of the Fund (the "Depositary"), there is a potential default risk if the assets of the Fund held with the Depositary are lost. However, such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary is liable to the Fund or to the investors of the Fund for the loss by the Depositary or one of its delegates of a financial instrument held in custody unless the Depositary is able to prove that the loss has arisen as a result of an external event beyond its reasonable control.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10 000 USD is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	USD 51	USD 269
Annual cost impact (*)	0.5%	0.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.3% before costs and 2.8% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	USD 0
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	USD 0

How long should I hold it and can I take money out early?

Recommended holding period: 5 year(s).

The recommended holding period for this product is 5 year(s). This is the period we recommend you to hold based on the risk and the expected return of the product. Please note that the expected return is not guaranteed. The greater the actual holding period deviates from the recommended holding period of the product, the more your actual returns may deviate from the product assumptions. Depending on your needs and restrictions, a different holding period may be suitable for you. Therefore, we recommend that you discuss this point with your client advisor.

Investors other than authorized participants may not subscribe for shares directly with UBS (Irl) ETF plc, but may purchase and sell shares, through an intermediary, on one of the stock exchanges listed for the share class on the website www.ubs.com/etf. In exceptional circumstances, direct redemptions with UBS (Irl) ETF plc, are however possible on each dealing day (as set out in the relevant supplement to the prospectus). Authorized participants may subscribe and redeem shares with the UBS (Irl) ETF plc under the conditions detailed in the relevant authorized participant agreement.

How can I complain?

If you have a complaint about the product, the manufacturer of the product or the person who recommended or sold the product to you, please speak to your client advisor or contact us at www.ubs.com/manco-fmie
